github.com/austinkarren

I am a full-stack developer especially interested in building and delivering applications that are clean, fast, functional and pleasing to the eye.

Education and Certifications

- **Cert. - Full Stack Developer,** University of Utah — **2020**
- **B.A. - Communication Studies,** Temple University — **2012-2015**

Technologies and Languages

- Languages: **JavaScript, HTML, CSS, SQL**
- Technologies: **React, jQuery, Node, Bootstrap, MySQL, Git**
- Other: **MongoDB, API, Command Line**

JavaScript Coding Projects

Media API - Delivers randomized book, movie and video game suggestions based on user input

- Built code for the .AJAX API calls that provides endpoint results
- Built code to randomize results to user (Math.floor, Math.random)
- https://austinkarren.github.io/media-api-group-project/

jQuery Day Planner - A simple calendar app for scheduling your work day

- Using moment.js and conditional statements, rows are color coordinated based on time
- Using localStorage.setItem(), user input is saved to local storage for future sessions
- https://austinkarren.github.io/day-planner/

Password Generator - Receives user inputs to generate a complex, random password

- Browser PROMPTS stored as variables then plugged into conditional statements that use .push method to create an array of possible character strings
- Uses array indexing and loops to build the password
- https://austinkarren.github.io/password-generator-two/

Work History

Mail Carrier **US Postal Service** **Jun 2019–Mar 2020**
Draper, UT, USA

- Advanced quickly due to demonstrated skills in organization and efficiency.
